Indemnity

This COC is issued on the prerogative of the site adhering to standards generated through long standing and extended experience and training within the tourism, guiding, recreation, adventure and outdoor industries, other known laws, by laws, regulations and best practices within these and other overlapping industries namely: the work at height, industrial construction, rescue and nature conservation industries. Qualifications and authorities on front page of the signate inspector.

Although ROAG has checked through a strict process if the COC's, SOP's other standards and modus operandi are in place at the said site and for its offerings mentioned, for safe operation and conduct, it will not be held or accept -responsibility for the legitimacy of its documents, its actions and camp sites not adhering to standards and safety matters they offered for, or within this COC, the process or if any matters that may have been overlooked.

Thus, the onus and responsibility still lies with every groups responsible person/person in authority, to check whether the campsite implements required or necessary safety standards and standards offered in its Site Safety File and adhere to its SOP's, Risk Assessment Mitigations and whether it operates according to its QMSS as a service provider.

Every client or person has the right and should refrain its own members from, or stop -any service or activity rendered at any given time, if such activity or service are offered in a manner contrary to adequate health, safety or good environmental practices, or if any other risk or hazards is evident, not accounted for, by the service provider or this COC.

These risks or hazards must/may include physical, social, spiritual and emotional health, wellbeing and safety practices that can not all be measured or checked with rubrics for every event of ROAG's clients issued with a COC.
